

**YES
NO
ON 23
WE
DID!**

Environmental Health Coalition and our allies [Communities United Against Prop 23](#) and the [California Environmental Justice Alliance](#) say **THANK YOU** to the hundreds of supporters who made calls, talked to their neighbors, knocked on doors and spread the word to Stop Proposition 23. **This victory for clean air and a healthy California belongs to you!**

As EHC moves forward with our plans to create a greener, healthier future, we know we can't do it alone. No single individual could have defeated Proposition 23, but **together, we proved that clean air and green jobs are a top priority for all Californians.**

[You can help us keep that momentum going by contributing to EHC.](#)

For as little as \$40, you can help our community Promotoras perform energy audits in low-income communities. These audits help residents save money by lowering their energy bills, and help the environment by reducing our demand for energy production. These communities have suffered the most from dirty energy policies, and **your donation will help us make sure the green economy benefits those who need it the most.**
