### **Via Verde**

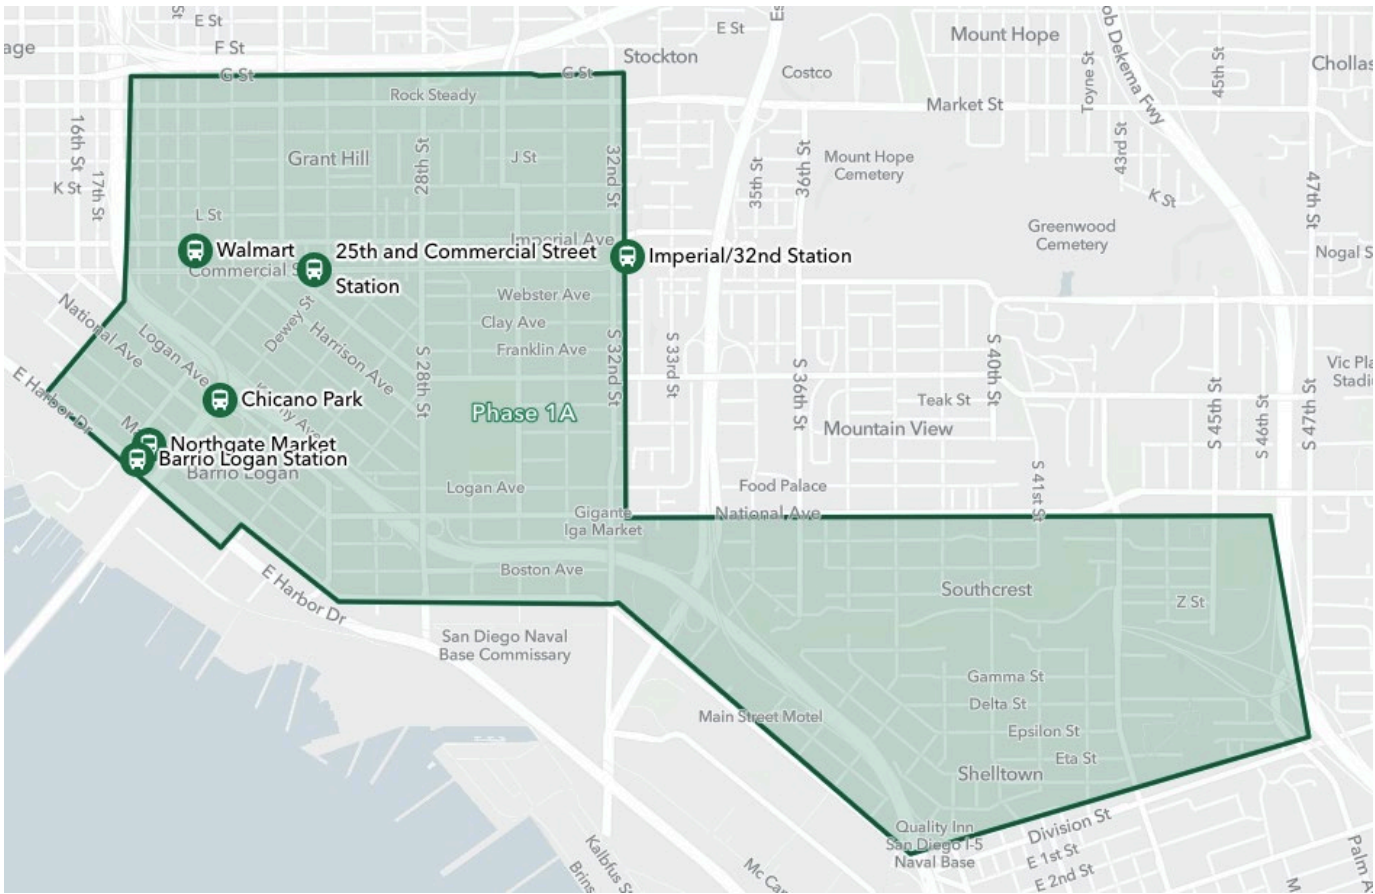

Via Verde will be a free, bilingual, on-demand electric vehicle shuttle service that safely and efficiently provides Barrio / Logan Heights residents, area business owners, their employees and patrons with door-to-destination transportation to the market, post office, local businesses, restaurants, community events, clinics, bus and trolley stops, parks, VFW, galleries, youth services and places of worship *without contributing to the toxic air quality and parking congestion that have plagued the community for decades.*

Run *by* the Greater Logan community in service to the community, Via Verde will be an app-based, intra-community sustainability initiative of the non-profit Chicano Park Museum and Cultural Center (CPMCC). The free Via Verde app will be downloadable on most Smart Phones – or operators can dispatch requests for a free ride via its bilingual call center.

For the first time since the State of California displaced and divided our community to make way for the 5 and 75 freeways, Via Verde can reunite our communities through accessible transportation. Community surveys in English and Spanish are ongoing to determine Via Verde's ideal service area, which could be expanded to include Sherman, Shelltown, Southcrest and Stockton.

Please share *your* priority service stops by taking our community survey, available in both English and Spanish [by clicking here](#).
